1 U.S. QUART (0.95)L

Plant-based Botanical Insecticide & Ovicide.

d-MIZE™ II non toxic

Questions or comments? Call 877-669-0482

The d-Mize formulation is an easy to apply, cost effective treatment for the control of pyrethroid resistant insects. d-Mize is a Use as a Direct or Indirect Residual Treatment. d-Mize offers Pest Control Operators and Homeowners seeking a DIY product two distinct modes of action. First, as a direct treatment, d-Mize acts as a contact killer insect spray against a wide variety of common pest insects. Second, as a indirect residual treatment, the lingering vapor of d-Mize will provide residual insect control activity for up to 20 days.

Application Use, Rates and Schedule

Use d-Mize for crack and crevasse treatment or as a structural fumigant spray. Apply d-Mize using a trigger sprayer or any B&G type applicator or any powered equipment including high volume, low volume, electrostatic or ultra-low volume fogging. Use approximately 1 ounce of d-Mize per 1.5-6 sq. ft. of surface depending on target material. One gallon of d-Mize will treat approximately 1,500 square feet in a fumigation protocol.

d-Mize may be applied safely to a number of indoor surfaces including carpets, fabrics, upholstery, painted and unpainted wood and metal materials. D-Mize may be applies as a spray (or fog) to bed frames, box springs, headboards, mattresses, linens, behind and under night stands, dressers, under or behind wall hangings, near moldings. Apply till wet any point where carpet and wall meet, anywhere Insects (especially bed bug and cockroaches) may be found. The direct spray of upholstery surfaces including cracks, crevasses, tufts, seems and edges will decrease the potential of further infestation of bed bugs. For best results allow a minimum of 3.5 hours drying time prior to re-entry. For on-going Bed Bug control, including eggs and nymphs re-apply every 7-14 days as needed.

Non-Toxic Insect Control

For multiple millennia humans have known of the non-toxic bug killing power of Neem oil, it has been scientifically proven to control over 200 species of Insects, hexapods and nematodes.

The EPA has determined that Cold Pressed Neem Seed Oil presents no toxicological, ecological or environmental concern.

People-Pets-Livestock and Premise Treatment

Use to kill fleas, chiggers, mites, mosquitos, flies and other parasite insects. Spray directly on all canine, bovine, avian and humans. Avoid contact with eyes. Use to eliminate mange and hot spots on all animals and livestock. Remove all plants, pets, birds and people from structure prior to ULV fogging agendas. Eradication of termites requires attic fogging to access termite colonies within the walls.

DO NOT DILUTE
NOT FOR USE ON PLANTS
